Defining sustainability

Brundtland Commission:

A sustainable development “...meets the needs of the present without compromising the ability of future generations to meet their own needs”

Defining sustainability

Brundtland Commission:

A sustainable development “...meets the needs of the present without compromising the ability of future generations to meet their own needs”

Three dimensions interact in the creation of sustainable solutions

- Environment
- Society
- Economy

United Nations' Millennium Development Goals

Eight goals to help the poorest achieve better living standards by 2015

Defining sustainability

Brundtland Commission:

A sustainable development “...meets the needs of the present without compromising the ability of future generations to meet their own needs”

Three dimensions interact in the creation of sustainable solutions

- Environment
- Society
- Economy

Sustainability - the UN global goals

17 goals to 'end poverty, protect the planet, and ensure prosperity for all as part of a new sustainable development agenda'

SDGs, targets and indicators

- 169 targets
- 232 indicators
- <https://www.un.org/sustainabledevelopment/sustainable-development-goals/>

SDGs, targets and indicators

169 targets

232 indicators

Goal 12. Ensure sustainable consumption and production patterns

12.1 Implement the 10-Year Framework of Programmes on Sustainable Consumption and Production Patterns, all countries taking action, with developed countries taking the lead, taking into account the development and capabilities of developing countries

12.1.1 Number of countries with sustainable consumption and production (SCP) national action plans or SCP mainstreamed as a priority or target into national policies

12.2 By 2030, achieve the sustainable management and efficient use of natural resources

12.2.1* Material footprint and material footprint per capita

12.3 By 2030, halve per capita global food waste at the retail and consumer levels and reduce food losses along production and supply chains, including post-harvest losses

12.3.1 Global food loss index

SDG impacts and levers

Levers for transformation

Global environmental commons

Human wellbeing

Linking goal

The global goals and engineers

- New agenda
 - For countries and companies
 - Until 2030
- The topics are old but the holistic perspective is new
- The role of you as future engineers is to integrate sustainability thinking and assessment in your work
 - Addressing all (relevant) goals
 - Taking a systems perspective on your technology
- Identify synergy og antagonism between the goals
